

Server Setup TODO

Plan Steps:

- ☒ Step 1: Created chemistry.net/index.html (redirects to chemistry.html) ☒
- ☒ Step 2: Created chemistry.net/server.py (Python http.server on 8080) ☒

Next Steps:

1. Run server: `cd d:/code/chemistry/chemistry.net && python server.py`
2. Open <http://localhost:8080> (redirects to chemistry.html)
3. Verify interactive periodic table works (click elements for modals).

Server serves entire chemistry.net/ directory statically.
